Types of customs procedures – e-Desk import module

The table below shows the different types of customs procedures that can be reported in the e-Desk import module of APCS.

- Column 1: code of the customs procedure. To be used in electronice data exchange (IMPDEC and IMPREP message)
- Column 2: description of the customs procedure if the code is not self explaining
- Column 3: indication whether an MRN number of exactly 18 characters is expected for this type of customs procedure. If no MRN number of 18 characters is expected, free text can be reported in the field 'DocumentNumber' in the Document group of the IMPDEC and IMPREP messages (minimum 1, maximum 18 characters).

Customs procedure - code	Customs procedure - description	MRN document of exact 18 characters?
